

PORTFOLIO — SEE THE WORK BEFORE YOU READ ABOUT IT

zaakirahdawoodhawa.github.io

An interactive case-study site: a complete brand system, a product launch, a knowledge hub, and the systems behind them — designed & built by me.

I take work from blank page to shipped. Most recently a 40-year software firm's entire brand presence — **identity, website, product launch** — as a consultant and team of one. Six years across financial services, AI and B2B software on two continents, spanning **communications, operations, administration, marketing and design** — with professional AI-training experience and a perfectionist's eye for the details that make organizations run.

EXPERIENCE

Marketing & Design Consultant — SES Inc., Calgary

2025 — PRESENT

- **Built the firm's first complete brand system** — logo, style guide, brochure and website (ses-software.com) — now governing every asset a 40-year software company ships.
- **Took the QPlant product to market as a team of one:** launch strategy, presentation decks, a product film, surveys and event collateral.
- Deliver ongoing creative and technical solutions — company presentations, videos, resource folders, training documentation — to a single brand standard.

AI Data Administrator & Quality Analyst — Invisible Technologies, Remote

2024

- **Held production AI models to client SLA standards** — evaluating prompts, testing multi-modal outputs, and running in-depth quality assessments.
- Refined model performance through structured error analysis and documentation adopted across the team.

CX & Communications Coordinator — Sanlam, South Africa

2021 — 2023

- **Implemented a knowledge management system** that became the primary onboarding tool for client-facing teams and cut repeat queries to senior staff.
- **Created and reviewed internal & external communications**, process documents and marketing material — brand-aligned and compliant, every time.
- Streamlined communication workflows (structured Jira intake) and produced corporate events end to end — budgets, vendors, logistics.

Portfolio Coordinator — SAPIN, South Africa

2019 — 2021

- **Prepared client investment policy statements and portfolio valuations** with accurate, audit-ready records and documentation.
- Supported compliance evaluations and client onboarding — precision work under regulatory scrutiny.

SKILLS

Organization & admin
